

FAMOCO MDM 2.4

RELEASE NOTES — November 5, 2019 — mdm.famoco.com

MDM 2.4 update is available as of Tuesday November 5, 2019 at 8:00pm (Paris/Brussels time). Service unavailability may occur with 30 min to 1 hour approximate duration during roll-out.

NEW

APP WHITELIST

MDM now allows admin users to define App Whitelists. If a profile is associated to an App Whitelist, all non-whitelisted apps are removed from devices associated to the profile.

ACTIONS HISTORY

All MDM logged events (such as *create*, *delete*, *put-in-fleet*, etc.) are available in a new table that comes with a full set of tools (filters, sorting, export).

IMPROVEMENTS

MEMBERS, ACTION TOKENS AND API ACCESS LISTS

Those three lists and corresponding dialog modals now run with a full new implementation and include several updates:

- Export new options: all rows, filtered/displayed rows or checkbox-selected row
- New side-panel data visualization for Action Tokens and API Access lists

OPERATIONS

OLD INTERFACE SHUTDOWN

The old FMS interface, hosted on my.famoco.com, is no longer accessible. Devices data is up to date on the MDM platform at mdm.famoco.com alongside with enhanced features.

- Old interface — API requests beginning with my.famoco.com/api continue to be served but any page request on the my.famoco.com domain is redirected to the new MDM homepage (mdm.famoco.com).
- Documentation — Any FMS Documentation or Developer Support page request on the docs.famoco.com or developers.famoco.com domains is redirected to the corresponding section of the new Famoco Documentation (help.famoco.com).
