

FAMOCO MDM 2.11

RELEASE NOTES — November 17, 2020 — mdm.famoco.com

MDM 2.11 update is available as of Tuesday November 17, 2020 at 8:30pm (Paris/Brussels time). Service unavailability may occur with 30 minutes to 1 hour approximate duration during roll-out.

NEW

DEVICE SYNC AUDIT LOGS

The former *History* section is now labelled *Audit Logs* and is divided in two sub-sections: *Settings* and *Syncs*. The *Settings* tab contains all modifications performed in MDM, the *Syncs* tab displays all the settings sent to the devices.

IMPROVEMENTS

FAMOCO LAYER VERSION

From now on, the Famoco Layer version is available as an additional header in the *Devices* list and is also displayed on the device side-panel alongside the Famoco OS version.

EXTENDED APPLICATION SEARCH IN PROFILE MODAL

In the profile edition modal, it is possible to search an application by its label, package name, package version name or version code.

USER LOGIN AND ORGANIZATIONS LIST IN MY PROFILE

The profile page is improved with a new *My Organizations* section that lists all the organizations the user belongs to. For each organisation, the corresponding role is also displayed. The *My Information* section also now displays the user's login (email address).

FIXES

MAPS

In some cases, the map displayed inaccurate device positions estimated from their IP address. The MDM 2.11 releases fixes that, from now on the *Maps* section shall only display devices localized using the GPS or via Network.
