Famoco OS FX205SE,1 v1.5.1 public Release Note

This is a maintenance release containing updates and fixes

Release build date : Mar 4, 2023   Release name : FX205SE,1_v1.5.1

Topic	Subject	Details
Feature	PicoTTS	Pico TTS integration
Feature	Default USB	When a device is plugged through USB, it is possible to pick a behavior for the Settings under Dev options (Charging, MTP, PTP, Ethernet, Audio source, MIDI). The feature consists in being able to force the default value for that choice from the MDM
Feature	Led customization	The green charging LED should be configurable depending on the percent of the battery voltage. Indeed there is a famoco feature to limit the battery regulation charge voltage to lengthen battery lifetime. Without this feature, the led color is red while it should be green
Feature	NFC bluetooth pairing	with this feature, bluetooth pairing by NFC becomes optional
Feature	NFC Wifi setup	with this feature, NFC wifi setup becomes optional
Bugfix	Mifare tag detection	Very hard to detect a tag when the EMV polling is enabled
Bugfix	Rare internet connection issue	On some GSM networks, and an on rare occasions, internet connection is periodically lost
Bugfix	NFC	failing to start a system application by using NFC beam
Bugfix	failing connectivity check	fail to do connectivity check on network that block http
Improvement	APN	Add Safaricom Ethiopia APN
Component update	Famoco Layer	Update Famoco Layer to 3.9.3
